NOTICE TO STOCKHOLDERS.

HAWAIIAN REALTY AND MATUR-
ITY CO., LTD.

A SPECIAL MEETING OF THE
stockholders of the Hawaiian Realty
and Maturity Co., Ltd., will be held at
the offices of the corporation, rooms 3
and 4, McIntyre building, on Fort
street on Thursday, the 20th day of
February, A. D. 1902, at 4 o'clock p. m.
for the purpose of declaring vacant the
office of director and auditor of said
corporation, held by W. E. Burnett, on
account of the permanent removal of
said W. E. Burnett from the Territory
of Hawaii; and for the purpose of
electing a stockholder to fill the vacan-
cy in said office of director and auditor,
and for the transaction of such other
business as may come before said
meeting.

P. H. BURNETTE,
Secretary of the Hawaiian Realty
and Maturity Co., Ltd.
Dated February 11, A. D. 1902. 6090

help or advice, is invited to commu-
nicate, either in person or by letter,
with Ensign Hattie E. Larabee, ma-
tron of the Salvation Army Woman's
Industrial Home, 488 King street, Ho-
nolulu. 6053

TOMA AND THE SEEDS

How Doyle Played It Down on Jap Policeman.

Toma Abe, the Japanese interpreter,
does not enthrall over horticulture, and
he has good reason for not doing so.
A day or so ago Chet Doyle, finding
that he was contracting a cold, sitting
on the police station steps, resolved to
be up and doing. He accordingly wrote
a note and gave it to Toma, together
with half a dollar, telling him to take
the note to the Hollister Drug Com-
pany's store. The note read as fol-
lows:

"Please give bearer 25 cents worth of
macaroni seed."

"Get a drink for yourself with the
quarter change," shouted Doyle to
Toma as he went off on his errand.

The man at the store told the officer
that they didn't keep what he wanted,
as the demand was not sufficient to
justify laying in a line.

Nothing daunted, Toma hiked over
to Benson & Smith's, where the clerk,
after searching the shelves, said that
he was very sorry, but they were all
out of macaroni seed, and wouldn't
have any more until the arrival of the
next boat from the Coast. Toma next
tried the Hobron Drug Company, and
was referred to the Honolulu Drug
Company, round the corner, which firm
it was explained, supplied the Punch-
bowl nurseries with the seed.

Then the Japanese got good and mad.
"What use you go in medicine busi-
ness?" demanded he. "You no keep
what I want; you no savvy one dam
bit. I want seed; I no want thing for
kid to play with in nursery."

He then tried the Fort street store,
where, after a full and sufficient ex-
planation, the point of the joke punc-
tured him.

Then he went and blew in the whole
half dollar at the nearest saloon, to
drown his remorse at having allowed
himself to be so imposed upon.

When he approached the police sta-
tion, Doyle was still warming the
steps.

"Well, Toma, did you get what I
wanted?" asked he.

"Aole," said Toma, nonchalantly,
"they no have got."

"Where's the change, Toma?" asked
Doyle.

"Oh, I spend him all," replied the
little Jap. "I get thirsty; too much
run, run; no use."

FORESTS OF HAWAII NEI

(Continued from page 1)

the trees, but I have told them that they
eat the ferns, and by doing so they open
up the forest and the insects then at-
tack the trees.

"On Maui, where the big ditch is, you
will find on the mauka side the forest is
a jungle, whereas below it is clear and
perfectly open. The undergrowth disap-
pears and the heavy Hilo grass comes in
and no seeds can then reach through and
germinate. There are some pretty park-
like places, but these do not conserve the
water as the ground dries up.

"Take the Islands as a whole, and there
are few localities where there are natu-
ral reservoir sites, and the water is wast-
ed. I think the planters are all alive to
the effects which the forests have over
the stream flow. The forests actually in-
crease the rainfall. The temperature in
the forest is lower than in the surround-
ing country, and when clouds come there
is a drop in the fall, but when they strike
the mountains where the timber is, the
rain comes down. In places where the
mountains are bare the rain does not
come. That has been proven. The plant-
ers feel the need of forests, but it does
not appear to me they have seen the
need at headwaters. Those who are ac-
quainted with the island of Hawaii know
that as you come from Hamakua to
Waimea and down through Pahala, most
of the slopes cannot be used for sugar
or grazing. The forests, if preserved
there, will increase the rainfall.

"Coming around to Hilo, you cross
stream after stream to the government
road. These streams are vitally import-
ant to the plantations in furnishing their
water, as it is too rough to construct rail-
roads. It is ten times more important to
preserve the forests at the headwaters
than below. If the forests were stripped
it would be hard to get the water. The
water would sink at the headwaters and
flow under through the strata and could
only be obtained by tunnelling and shaft-
ing."

"I would suggest that the planters se-
gregate those lands which are adjacent
and along the headwaters of the streams.
That is the principal thing to do. It is
not only a question of segregating these
lands, but also a question of fencing. At
Pahala they have 31 miles of fencing and
have had it there for five years; before
the fencing was up you could ride all
the way through the forest after hulloks,
but through the forest after hulloks, and
now there is no trail, and you can only
get through by using a cane knife.

"The rapidity of denudity and the rapid-
ity of growth in the Islands has sur-
prised me. This is not a question of
leaving forests for posterity to enjoy.
It is a question of now. I think the cat-
tle business ought to be run with a little
more system. When I have asked where
cattle were, I have been told, 'Ewa',
mauka in the forests. The cattle
mauka in the forests. The cattle
to escape the heat and horn-flies and
to obtain the moisture. That is what is
driving the forests back and it means
the forests will be destroyed by cattle
and sheep. On the ranches where the
cattle are being handled in paddocks lit-
tle damage is being done.

"Putting trees alongside the plantations
is an excellent thing, especially on Oahu
along the Waianae and Koolau ranges.
It is surprising to see what the forests
will do when fenced off. Back of Ewa,
where the country has been enclosed,
young koa trees are coming up. Mr.
Baldwin on Maui has found by plowing
that hundreds of young koa trees have
come up, which shows that the seed will
hold its germinating power for a period
of ten years.

"Most of the government lands are un-
der long leases, so the government can-
not do much at present. There are gov-
ernment grounds which the Territorial
government, I suppose, could set aside
as forest preserves, but as the planters
and grazers have the lands, it rests with
them very largely as to what they will
do. If the planters and managers will
get together and each say 'I will fence
off this land and that,' and so on, the
forests will be protected, and you will
have a good water supply. On Maui I
was delighted to find the forests in good
condition, but even there an enormous
amount of damage is being done. The
vital points in Hawaii lie between Hilo
and Hamakua. My idea is that the
planters should get together and ask
which are the forests on the streams and
which those at the headwaters, and then
set these aside and preserve them. On
Molokai the forests are so far gone that
little can be done except by planting;
they are almost extinct.

On Oahu, Honolulu and other planta-
tions, they must do something to protect
the forests. They must know that the
artesian water they are getting is water
that is falling on the mountains, and
coming through the strata, and if the
forests are destroyed, they will surely
feel its effects on their water supply.

"Washington would be glad to do any-
thing it can to help. I am going to Ma-
nilla, and I propose to send you some
timber trees to clothe the upper slopes
of your mountains. I would like to re-
commend you to try Philippine pines. The
trouble with your present forests is that
the seeds are so heavy they fall close
to the trees, and are suppressed by the
shade. This causes the forests to spread
but slowly. The pine has been used very
successfully in Switzerland and France,
and in the States. Within five years in
South Dakota, in a preserve, they ob-
tained 60,000 young plants to the acre.

The seeds of the pine scatter over the
land, and do not remain near the trees
from which they fall."

Governor Dole, at this point, inquired
whether, in Mr. Griffith's examinations
of the timber trees, he thought that
there was a possibility of introducing
foreign trees as a commercial proposi-
tion, as well as to conserve the water
supply. Mr. Griffith said he had thought
of that in conjunction with the price of
cordwood, which people paid here—\$12 to
\$14 a cord. He suggested that if the Ter-
ritorial government raised algaroba trees
on government lands it would serve a
double purpose, one of which was to in-
crease the revenues. He stated further
that the government should keep a very
tight control over the opening up of the
forests. Fencing was expensive, and if
there were great pine forests, fence posts
would be obtained at a much less price
than at present.

A vote of thanks was tendered to Mr.
Griffith for his interesting talk, and after
organizing the branch of the American
Forestry Association, the Kamehameha
Glee Club closed the meeting by singing
a pot pourri of native airs.

HAWAIIAN LODGE, NO. 21, F. & A. M.

THERE WILL BE A SPECIAL
meeting of Hawaiian Lodge No. 21,
F. & A. M., at its hall, Masonic Tem-
ple, corner of Hotel and Alakoa streets,
THIS FRIDAY, February 14, at 7:30
o'clock p. m.

WORK IN FIRST DEGREE.
Members of Pacific Lodge, Lodge 16
Progres, and all sojourning brethren
are fraternally invited to attend.
By order of the W. M.

JNO. A. HASSINGER,
Secretary.
